

Stat-Gun 2

The Stat-Gun 2 is a cordless, advanced ionizing gun capable of producing the necessary energy to neutralize static electricity existing on charged surfaces to leave them free of dust particles, ready to be painted.

Features:

- cordless, non-radioactive device
- ATEX approved
- Reduces dust particles, patches of grime, rings, and uneven surfaces
- Improves color-matching as the paint layer will be more even
- Reduce paint consumption, repainting and polishing
- Improves profitability
- Just to be connected to the compressed air source

Technical Specifications:

- Powered by an 8.4 V li-ion battery
- Chargeable through a separate charger
- The charger is connected to 95-265 V AC
- Operational time approx. 10 hrs continuously
- Compressed air pressure 2-4 bar, adjustable at gun airconnection
- Microprocessor-controlled

Diodes explanation:

in use

- Double flash: internal information (Stat-Reader)
- Yellow light: when you use the Gun and the ionization is working.

when Charger is connected

- Red light: only when charging
- Yellow double flash: fully charged
- Yellow fast flash: indication that the battery needs to be charged
- Yellow slow flash: half charged
